

SUSTAINABILITY OBJECTIVES

of BorsodChem Zrt.

We defined our sustainability objectives to be achieved between 2025 and 2027 as follows:

1. Reporting system for the management on present and potential environmental, social and financial effects and significant risks in our entire value chain.
2. Introduction of an ESG framework system
3. Initiate cooperation with strategic partners within the supply chain to explore solutions to reduce GHG and product carbon footprints.
4. 5% reduction in Scope 1-3 GHG intensity of key products. (Base year: 2024)
5. Validation of GHG reduction targets for 2030 and 2050 by the SBTi organization.
6. We publish our Sustainability Report on an annual basis in accordance with current regulations.
7. 5% reduction of water withdrawal from the Sajó River.
8. In order to create an accurate water balance, we ensure the measurability of the main water flows within a 5% margin of error, and in order to increase water recycling, we introduce a water quota accounting system.
9. We carry out the due diligence of our major suppliers from a sustainability point of view.
10. A 10% reduction in the number of accidents involving loss of working time compared to the best data of the 3 years preceding the current year.
